React Native, Expo, Expo Router, REST API
Integration, NativeWind

Tools and IDEs:

VS Code, Git, GitHub

State Management

Redux, Redux Toolkit, React Redux

Projects

Cucina – Recipe App

React Native, Expo, Expo Router, TheMealDB API, NativeWind, expo-image

- Built a recipe app for both Android and iOS using React Native.
- Connected the app to an online API to show 600+ recipes in 14 different food categories.
- Created 4 screens – Home, Categories, Meal List, and Recipe Detail ,with smooth navigation between them.
- Fixed image loading issues so images load fast and without flickering when scrolling.
- Built a clean and good looking UI.

Trek Website

React , HTML, CSS , JavaScript

- Built a single page website for trekking information using React.
- Added a navbar with smooth scroll to sections like Home, About and Contact.
- Styled the website with CSS for a clean and simple layout.
